

# Facts About The Central Texas Airport

## BASTROP COUNTY'S 381 AGREEMENT WITH CARPENTER & ASSOCIATES FOR THE CENTRAL TEXAS AIRPORT AND GREEN CORPORATE CENTER WOULD:

- Put Cedar Creek High School students at risk from low flying planes and noise pollution
- Allow Boeing 737-Class cargo aircraft up to 100 tons to operate from the CTA
- Allow up to 250 flights daily of large aircraft approaching lower than 100 feet over populated areas
- Remove FAA regulations including the FAA Wildlife Hazard Zone safety recommendations that would protect Bastrop county residents and air travelers
- Compromise security by allowing the CTA to accept international flights with only 'Private Security' supervision

## ENVIRONMENTAL AND PROPERTY RIGHTS ABUSES

- Use of jet fuel, de-icing fluid and other toxic chemicals in or near flood plains of the Colorado River, its tributaries and out-croppings of the Carrizo aquifer would threaten water quality.
- Increased air, water, light and noise pollution would degrade quality of life.
- No Environmental Impact Study, on-site noise study or traffic impact study has been submitted.
- Property rights within the Airport Compatibility Zone (see insert) would be limited and property valuations would decline.
- No funding for property acquisition in areas made uninhabitable by jet noise has been allocated.

## OTHER CONSIDERATIONS

- There was NO PUBLIC INPUT as to the merit of the project.
- Two airports serving similar clientele - Austin Bergstrom International and Austin Executive - already exist within 13 miles of the proposed CTA. Another airport is redundant.
- The project is not clearly defined and no construction plans have been submitted.
- Specifications of size, type and purpose of aircraft allowed at the airport are incompletely defined in the 381 Agreement.
- The 'Mutual Assistance' clause of the 381 Agreement obligates the County to assist the developer in every way including financial. Can you say bailout?
- The developer has a less than stellar reputation including a 2009 civil judgment upholding a verdict of 'fraud and breach of fiduciary duty'. (Sandra McBeth v. James R. Carpenter)

## IT'S NOT A 'DONE DEAL'
