CONFIDENTIAL DOCUMENTS – ECONOMIC DEVELOPMENT NEGOTIATIONS

Judge;

We settled our transactional terms and have now executed the Letter of Intent with TIGA Energy Resources for the first deployment of their patented technology. You can replace their original proposed LOI with this executed version in your book. This demonstration of real time managed and measured energy management capabilities will change energy and communications technologies and methodologies. LEEDs standards will have to be rewritten to incorporate this application in order to achieve maximum energy efficiency.

We are at the top of the list with [redacted] for their new division operations. We are just waiting to hear if the government awarded them the 3 contracts as expected. We will have to provide the owner of [redacted] and his CEO with an overwhelming show of support from the County and our development and construction team has already been briefed on what their responses will need to be for us to convince [redacted] that we can have them operational at the opening of the airport facilities.

Jim
