RE: Central Texas Airport, Bastrop County, Texas – Federal Aviation Administration Airspace & Landing Rights Evaluation for Proposed Airport Project

Dear Jim,

It is my pleasure to inform you that the Central Texas Airport Project is in compliance with Federal Aviation Regulation Part 157. This opinion is based on my personal examination followed by ongoing dialogue with FAA Officials involved in this review. Key personnel in FAA Airports, Flight Standards, and Air Traffic Control have consistently assisted with this project. As reflected in Mr. Ben Guttery's letter dated January 2, 2008, the Central Texas Airport Project meets or exceeds all requisites of the local and National Airspace System. (Ben is Senior Programs Manager for Texas Airports)

On August 2, 2007 our project evaluation team toured the proposed airport location with Mr. Bill Gunn, Director of Systems and Training Planning, Aviation Division, Texas Department of Transportation. His positive reaction has been demonstrated through continuing support for the facility.

That same afternoon, we met with the local FAA Air Traffic Team serving the Austin, Texas area. Our project was discussed with Mr. Earnest Saulmon, Air Traffic Manager, and Gary L. Estes, Air Traffic Control Specialist and support Manager of the Austin Area Air Traffic Control System. They indicated their support for the Central Texas Airport project commenting that "it couldn't be in a better location" to blend with the existing airspace control system.

My attached resume provides a history of my extensive experience in evaluating airspace issues; spanning a period from the "Berlin Airlift" to present day technology. Relying on such familiarity with the National Aviation system and structure, I am qualified to express judgment that the Central Texas Airport Project is a "winner".

Congratulations!

Best Regards,

Norm Scroggins, Aviation Consultant
